- Description of a child's own house
- Areas/Places, rooms in the house and work done in these areas/places
- Need for a house
- Cleanliness of house
- Ways of decorating houses

## HOUSE

We need a house to live in. A house protects us from heat, cold, storm and rain. It also protects us from wild animals, thieves and robbers. Our house keeps us safe.

We live in a house with our family. The house is our home. We come back from school or work to our home.

At home we take rest, eat and spend time with our family.

People living in a house love and care for each other.

## Types of Houses

We can see different types of houses around us. Some houses are big. Some houses are small. Sometimes, a tall building has many houses in it. These are called flats.

Bungalow

Small house

Flats

In some places, people live in big boats. These are called houseboats.  
What kind of a house do you live in? Tell us more about your house.
